Java How to Program: Late Objects Version, Addison-Wesley's Java Backpack Reference Guide (8th Edition) Paul Deitel

This package contains *Java How to Program: Late Objects Version, 8e, and Addison-Wesley's Java Backpack Reference Guide*.

The Deitels' groundbreaking *How to Program* series offers unparalleled breadth and depth of object-oriented programming concepts and intermediate-level topics for further study. This survey of Java programming contains an optional extensive OOD/UML 2 case study on developing and implementing the software for an automated teller machine. The Eighth Edition of this acclaimed text is now current with the Java SE 6 updates that have occurred since the book was last published.

The **Late Objects Version** delays coverage of class development until Chapter 8, presenting the control structures, methods and arrays material in a non-object-oriented, procedural programming context.

Addison-Wesley's Java Backpack Reference Guide provides a quick reference to Java's most frequently used keywords and APIs. It is clear and easy-to-use, integrating syntax examples, keyword descriptions, and programming tips in a way that will make it the must-have reference in your backpack. This inexpensive reference provides a lot of information for the introductory and intermediate programming student or someone who just wants the specifics of Java in one handy place.
