## **Stochastic Controls: Hamiltonian Systems and HJB Equations (Stochastic Modelling and Applied Probability)** Jiongmin Yong, Xun Yu Zhou

As is well known, Pontryagin's maximum principle and Bellman's dynamic programming are the two principal and most commonly used approaches in solving stochastic optimal control problems. \* An interesting phenomenon one can observe from the literature is that these two approaches have been developed separately and independently. Since both methods are used to investigate the same problems, a natural question one will ask is the following: (Q) What is the relationship between the maximum principle and dynamic programming in stochastic optimal controls? There did exist some researches (prior to the 1980s) on the relationship between these two. Nevertheless, the results usually were stated in heuristic terms and proved under rather restrictive assumptions, which were not satisfied in most cases. In the statement of a Pontryagin-type maximum principle there is an adjoint equation, which is an ordinary differential equation (ODE) in the (finite-dimensional) deterministic case and a stochastic differential equation (SDE) in the stochastic case. The system consisting of the adjoint equation, the original state equation, and the maximum condition is referred to as an (extended) Hamiltonian system. On the other hand, in Bellman's dynamic programming, there is a partial differential equation (PDE), of first order in the (finite-dimensional) deterministic case and of second order in the stochastic case. This is known as a Hamilton-Jacobi-Bellman (HJB) equation.

### **From reader reviews:**

#### **Keri Yokum:**

Hey guys, do you desire to find a new book to see? Maybe the book with the name Stochastic Controls: Hamiltonian Systems and HJB Equations (Stochastic Modelling and Applied Probability) suitable to you? Often the book was written by a popular writer in this era. Typically the book titled Stochastic Controls: Hamiltonian Systems and HJB Equations (Stochastic Modelling and Applied Probability) is one of several books which everyone reads now. This specific book was inspired a number of people in the world. When you read this e-book you will enter the new age that you ever knew before. The author explained their concept in a simple way, therefore all of people can easily understand the core of this e-book. This book will give you a wide range of information about this world now. In order to see the representation of the world in this particular book.

#### **Tony Sanford:**

Reading an e-book tends to be a new life style in this particular era of globalization. With looking at you can get a lot of information that can give you benefit in your life. Having a book everyone in this world can share their idea. Publications can also inspire a lot of people. Lots of authors can inspire all their readers with their story or maybe their experience. Not only the story plot that share in the guides. But also they write about the ability about something that you need case in point. How to get the good score toefl, or how to teach your kids, there are many kinds of book that exist now. The authors in this world always try to improve their skill in writing, they also do some exploration before they write with their book. One of them is this Stochastic Controls: Hamiltonian Systems and HJB Equations (Stochastic Modelling and Applied Probability).

#### **Kermit Moors:**

Why? Because this Stochastic Controls: Hamiltonian Systems and HJB Equations (Stochastic Modelling and Applied Probability) is an extraordinary book that the inside of the reserve waiting for you to snap it but later it will shock you with the secret idea inside. Reading this book alongside it was a fantastic author who also writes the book in such a remarkable way makes the content within easier to understand, an entertaining way but still conveys the meaning entirely. So, it is good for you because of not hesitating having this anymore or you going to regret it. This amazing book will give you a lot of gains than the other books have such as help improving your expertise and your critical thinking way. So, still want to delay having that book? If I ended up you I will go to the e-book store hurriedly.

#### **Norma Barnes:**

What is your hobby? Have you heard which question when you got learners? We believe that that query was given by a teacher with their students. Many kinds of hobby, everyone has different hobbies. And also you know that little person like reading or as reading through become their hobby. You need to understand that reading is very important in addition to books as to be the issue. Books are important things to include you

knowledge, except your personal teacher or lecturer. You discover good news or update about something by book. Amount types of books that can you choose to adopt be your object. One of them is this Stochastic Controls: Hamiltonian Systems and HJB Equations (Stochastic Modelling and Applied Probability).
