**Advances in Corrosion Science and Technology** Mars G. Fontana, Roger W. Staehle

This series was organized to provide a forum for review papers in the area of corrosion. The aim of these reviews is to bring certain areas of corrosion science and technology into a sharp focus. The volumes of this series are published approximately on a yearly basis and each contains three to five reviews. The articles in each volume are selected in such a way as to be of interest both to the corrosion scientists and the corrosion technologists. There is, in fact, a particular aim in juxtaposing these interests because of the importance of mutual interaction and interdisciplinarity so important in corrosion studies. It is hoped that the corrosion scientists in this way may stay abreast of the activities in corrosion technology and vice versa. In this series the term "corrosion" is used in its very broadest sense. It includes, therefore, not only the degradation of metals in aqueous environment but also what is commonly referred to as "high-temperature oxidation." Further, the plan is to be even more general than these topics; the series will include all solids and all environments. Today, engineering solids include not only metals but glasses, ionic solids, polymeric solids, and composites of these. Environments of interest must be extended to liquid metals, a wide variety of gases, nonaqueous electrolytes, and other non aqueous liquids.

### **From reader reviews:**

#### **Lorraine Briggs:**

Book is written, printed, or highlighted for everything. You can recognize everything you want by a guide. Book has a different type. As we know that book is important factor to bring us around the world. Adjacent to that you can your reading ability was fluently. A e-book Advances in Corrosion Science and Technology will make you to be smarter. You can feel considerably more confidence if you can know about every thing. But some of you think in which open or reading some sort of book make you bored. It is not make you fun. Why they might be thought like that? Have you looking for best book or acceptable book with you?

#### **Casey Larsen:**

Information is provisions for individuals to get better life, information today can get by anyone from everywhere. The information can be a expertise or any news even restricted. What people must be consider whenever those information which is within the former life are hard to be find than now's taking seriously which one is suitable to believe or which one typically the resource are convinced. If you obtain the unstable resource then you buy it as your main information there will be huge disadvantage for you. All those possibilities will not happen within you if you take Advances in Corrosion Science and Technology as the daily resource information.

#### **Peggy Ross:**

Spent a free time and energy to be fun activity to accomplish! A lot of people spent their leisure time with their family, or their very own friends. Usually they undertaking activity like watching television, likely to beach, or picnic from the park. They actually doing same thing every week. Do you feel it? Will you something different to fill your free time/ holiday? Can be reading a book is usually option to fill your no cost time/ holiday. The first thing you ask may be what kinds of publication that you should read. If you want to attempt look for book, may be the guide untitled Advances in Corrosion Science and Technology can be very good book to read. May be it is usually best activity to you.

#### **Frances Wiggins:**

What is your hobby? Have you heard this question when you got college students? We believe that that query was given by teacher with their students. Many kinds of hobby, All people has different hobby. And you also know that little person including reading or as looking at become their hobby. You have to know that reading is very important in addition to book as to be the point. Book is important thing to include you knowledge, except your own personal teacher or lecturer. You see good news or update with regards to something by book. Different categories of books that can you choose to adopt be your object. One of them is this Advances in Corrosion Science and Technology.
