## **The SHTF Preparedness.**

### **Proven Methods for Water Purification & Filtration**

You will hopefully learn about water filtration to have several ideas on how to look at particular common resources in a way that makes your mind align those resources into ways to engineer a water filter-- should the time of need ever arise.

The basics are simple, and somewhat flexible. Most of the designs are simple gravity-fed systems of filtration, and can be constructed at zero cost and in minutes using only common materials.

You'll also learn some important chemical properties and characteristics of water that will give you a much finer perspective on what it is and how it gets contaminated-- and how it can be cleaned.

You'll understand the design of how to construct water-filters based on performance to meet your needs. You'll also consider multiple ways of delivering clean water in an absolute pinch using nothing but a rag or a shirt!

You will know a lot more about water filtration than the common individual who's out there walking the street. As a result of that knowledge, you may be able to save their lives-- or your life with a simple practice of primitive engineering.

You will be much more able to survive now.

## Some topics covered:

- The necessity of water & The basics of water filtration
- Two bottles, cotton, sand, charcoal, and gravel
- Simple charcoal filter
- The shirt strainer method
- Safest bet
- Distilling water
